December 2012

FEATURED PROJECTS

PetBasket

GitHub: <https://github.com/maclay13531/20171108-backend-proejct>

November 2017

Live site:

- CRM website for pet lovers to adopt dogs and cats.
- Built with Node.js Express generator, all fundamentals from HTML(EJS view template), CSS (materialize), and JavaScript (jQuery).
- Utilizes Node.js modules – MySQL, Socket.IO, Multer; MySQL utilized to modify and/or display data on the front-end page.

NavAPP

GitHub: <https://github.com/maclay13531/20171024-FrontEndProject>

October 2017

Live site:

- Navigating tool for travelers to find directions with the current or forecasted weather.
- Built with HTML, CSS and JavaScript. Uses Google API, Zomatoe API, and open weather API to obtain needed information.

BlackJack4Noob

GitHub: <https://github.com/maclay13531/20171005-JS-BLACKJACK>

September 2017

Live site:

- Basic Blackjack card game for beginners.
- Built with HTML, CSS, and JavaScript; jQuery for the Blackjack logic path.

PROFESSIONAL EXPERIENCE

Gresham Smith & Partners – Structural Engineer

April 2014 - August 2017

- Designed structural components and modeled into CAD software (Revit & AutoCAD).
- Coordinated with other engineering disciplines and/or architectures to ensure structural components are not in conflict with the other building objects.
- As an engineering liaison, assisted foreign clients and internal teammates to make sure that both parties were clear on engineering issues and solutions.
